

DISCLOSURE OF PHYSICIAN OWNERSHIP INTEREST

Due to your physician's concern over improving quality of care and controlling the cost of your health care, Midessa Neurosurgery and Complex Spine provides in office ancillary services at your convenience. One of the major reasons patients do not follow up with care is lack of coordinated care. Our goal is to provide you comprehensive brain and spine care. We provide in office x-ray imaging, Durable Medical Equipment (e.g. Neck braces) and on-site physical therapy so that you have one stop for all your care.

This investment provides your physician an opportunity to be actively involved in the quality control over your treatment. Your Physician's ownership interest in these entities does mean that your physician may benefit financially through these entities. Due to this, your physician hereby advises you that you have the right to choose to receive ancillary services like x-ray imaging, Durable Medical Equipment and physical therapy at any facility of your choice and we will be happy to continue to provide you with the highest quality neurosurgery and spine care. We will make arrangements for such an alternative should you so desire.

I have read and understand this disclosure of interest by my physician
